### Konu: Kısa Yoldan Bölme İşlemi Etkinliği 2

Aşağıdaki bölme işlemlerini örnekteki gibi kısa yoldan yapalım.

$$\begin{array}{r} \cancel{60} \div \cancel{10} = 6 \\ \begin{array}{r} \cancel{60} \overline{) \cancel{10}} \\ \underline{- 6} \phantom{0} \\ 0 \end{array} \end{array}$$

$$\begin{array}{r} 30 \div 10 = \dots \\ \begin{array}{r} 30 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 50 \div 10 = \dots \\ \begin{array}{r} 50 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 20 \div 10 = \dots \\ \begin{array}{r} 20 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 50 \div 10 = \dots \\ \begin{array}{r} 50 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 40 \div 10 = \dots \\ \begin{array}{r} 40 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 70 \div 10 = \dots \\ \begin{array}{r} 70 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 90 \div 10 = \dots \\ \begin{array}{r} 90 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 100 \div 10 = \dots \\ \begin{array}{r} 100 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 300 \div 10 = \dots \\ \begin{array}{r} 300 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 600 \div 10 = \dots \\ \begin{array}{r} 600 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 200 \div 10 = \dots \\ \begin{array}{r} 200 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 800 \div 10 = \dots \\ \begin{array}{r} 800 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 400 \div 10 = \dots \\ \begin{array}{r} 400 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 500 \div 10 = \dots \\ \begin{array}{r} 500 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

$$\begin{array}{r} 700 \div 10 = \dots \\ \begin{array}{r} 700 \overline{) 10} \\ \underline{- \dots} \phantom{0} \\ \dots \end{array} \end{array}$$

Aşağıdaki bölme işlemlerini kısa yoldan yaparak sonuçları ile eşleştiriniz.

$70 \div 10$	•	•	4
$500 \div 10$	•	•	30
$80 \div 10$	•	•	8
$600 \div 10$	•	•	60
$300 \div 10$	•	•	3
$40 \div 10$	•	•	7
$900 \div 10$	•	•	50
$30 \div 10$	•	•	90

Aşağıdaki tabloları bölme işlemine göre örnekteki gibi tamamlayalım.

÷	10	10	10	10
90	9			
80				
70				
60				
50				
40				

÷	10	10	10	10
100	10			
200				
300				
400				
500				
600
