The image displays four horizontal number lines, each with arrows at both ends. Each line has 11 vertical tick marks, creating 10 equal intervals. The first tick mark on the left is labeled '0' in red, and the last tick mark on the right is labeled '1' in red. The number lines are intended for placing fractions:

- Line 1:** A red question mark '?' is placed above the 4th tick mark from the left.
- Line 2:** A red question mark '?' is placed above the 8th tick mark from the left.
- Line 3:** A red question mark '?' is placed above the 2nd tick mark from the left.
- Line 4:** A red question mark '?' is placed above the 6th tick mark from the left.

To the right of each number line is a set of three horizontal lines for writing: a solid top line, a dashed middle line, and a solid bottom line.

12 tane yumurtanın $\frac{1}{3}$ i ile annem pasta yaptı. Annem pasta yapmak için kaç tane yumurta kullanmıştır?

Mert'in 20 tane misketi var. Misketlerinin $\frac{1'}{5}$ ini arkadaşına verdi. Mert, arkadaşına kaç tane bilye vermiştir?
